

Efraim Pavlidis, *email:* pavlidis.efraim@gmail.com

Front-end developer well-versed in JavaScript, CSS, HTML and Vue with a deep appreciation for nature and sustainability and dedicated to creating smart and responsive user interfaces that meet the unique needs of farmers. Leveraging the power of Vue, he develops dynamic platforms that optimize data visualization, crop management and weather monitoring.

Through partnerships with the farming community, he aims to cultivate a digital landscape that promotes growth, enhances productivity and fosters a brighter and greener future for all.
